

# MANIFESTO

If I get elected as a member of Parliament:

1. I will try to make the parliament more easily accessible and easily contactable. Every information of concern regarding the actions taken by the parliament should be informed to everyone.
2. I will try to provide the solution which can be resolved as soon as possible or pass any major concern to the parliamentary body as soon as possible.
3. I will act solely to represent the topic of concern which is happening to majority of students.
4. There is very less socialization among batchmates because of online semester. There are people who want to socialize but are not able to socialize properly. I will try to ensure more socialization among the batchmates and everyone can share a common concern if he/she thinks it can be of everyone's concern.
5. If the administration decides to open the campus as soon as possible, I will try to ensure smooth transition from online to offline semester.
6. I will try to pass the concern regarding lag during quizzes and other issues in assignments etc. to the professor with proofs so that the professor atleast knows about the concern and can be passed to IT Cell.
7. I will try to resolve the issue where a single person who mails the professor leads to change something for the whole batch which leads to too much problems. I will try to pass the information which majority of the batch favors regarding any concern to the concerned person.
